FREIGHTLINER

Owing to planned engineering work on the GEML during the Easter weekend, all freight will be booked to divert via Leicester, Peterborough and Ely in both directions. In addition, as a result of work taking place in Scotland over Easter, the Intermodal freights to and from Coatbridge will divert via alternative routes using diesel traction.

There were no other known alterations affecting the operations of the electric freights in April. However, this situation can change at short notice and often does, so please check back for regular updates.
