

**EFFECTIVE FROM 20<sup>TH</sup> SEPTEMBER 2014 UNTIL FURTHER NOTICE**

They require 10 sets of stock for 15 locos. The trains listed below should be correct, but as ever mistakes can be made, so get in touch by email if I have omitted any errors (last updated 12/1/14). In addition, there are no **unit** diagrams to worry about for Saturday operations between Norwich and London.

On the odd occasion engineering work takes place on Saturdays mostly in the late evening and will therefore affect a small handful of trains. Headcodes generally remain the same during service alteration periods.
