DFLC Pool (active fleet):

In the late evening 90014 & 90044 could be found working 4L81, but 90014 suffered technical issues and the train was subsequently looped at Eden Valley. A short time afterwards, 4L89 ran alongside at Eden loop and detached the lead loco, which was 90007 and then attached to the front of 4L81.

The loco change resulted in 4L81 going forward to Basford Hall using 90007 & 90044 (90014 was then DITL). The other freight train (4L89) went forward solo to Basford Hall by 90045, which was only permissible due to 4L89 having a lighter load, which a single 90 could manage.
