The failure occurred in the same area as the one on Wednesday night. Similar to the first incident, I am unable to confirm what initially rescued the failed train or what took it north to Mossend although 66091 may have been involved for part of the rescue (there was a 1Z99 sent from Preston to clear the line – this may have been 90020/90021 which was in the area on 4M30). A 1Z99 was also sent from Carlisle Yard, which may have been 66091 (to be advised).</p> <p>The train finally arrived Mossend just over 4hours late. Because the incident happened in the same location, could it have been an infrastructure issue that caused the double failure!
