90040	3 rd June 2006	Wear & Tear / Special Test	
90050	4 th December 2004	Fire Damage	Crewe LNWR

Latest News - Stored 90024 Crewe LNWR (1/10/12)

In late September 2012, 90024 were placed into the WNTR Pool but the loco has now moved to the long-term store pool of WNW. It is anticipated that the 90 will re-enter traffic at some point with DB after maintenance has been carried out.

Past News - Stored 90050 Crewe LNWR (16/8/12)

In early August 2012 90050 which was owned by DB Schenker and had been in store at the IEMD since December 2004 following fire damage at Coventry was purchased by Crewe LNWR. The main purpose for 90050 transferring ownership is so as she can donate a number of parts to other class 90s including bogies which are to go to 90042.

At the time of writing I am unable to confirm what will happen to this loco in the coming weeks and months, but for now she is safe from being cut up. There is a possibility that this 90 could be used as a static display at some point in the future and this can't be ruled out, but this is just one of a number of outcomes for this last class 90 to be built and outshopped by BREL at Crewe Works in 1990.

Further updates to this fact sheet will be made in due course notably for 90050 – if you have any questions or suggestions etc in the meantime, then please do not hesitate to contact me via email at info@class90electriclocogroup.co.uk
