

Engineering Work Alterations

June 2025

Updated 26/5/25

NATIONAL SUMMARY

Nothing to report at the time of posting.

ALL OPERATORS INCLUDING FREIGHTLINER

The service alterations shown below are for routes which class 90s operate on for Freightliner but similar alterations apply to other operators who do not use Class 90s.

West Coast Main Line

WCML / Scotland / Midlands / South / NW England:

- Sunday 1st June - WCML shut north of Carlisle (diversions apply). This impacts 4S49 and 4M30.
- Sunday 8th June - WCML shut north of Carlisle (diversions apply). This impacts 4S49 and 4M30.
- Monday night 9th June to Friday morning 13th June – Mid-week nighttime diversions via the West Midlands area due to Trent Valley being shut (see RTT for specific trains).
- Sunday 15th June - WCML shut north of Carlisle (diversions apply). This impacts 4S49 and 4M30.

There were no other known alterations to report on at the time of publication. However, engineering work does take place on various sections of the WCML during the week and at weekends at short notice. It is advisable to check real-time data sources for specific trains on specific days just to be sure that the train you're looking for is a runner or diverted.

East Anglia / GEML

- Monday night 9th June to Friday morning 13th June – Mid-week nighttime diversions via the East Midlands / Peterborough area due to GEML being shut (see RTT for specific trains).

There were no other known alterations to report on at the time of publication. However, engineering work does take place on various sections of the GEML during the week

and at weekends at short notice. It is advisable to check real-time data sources for specific trains on specific days just to be sure that the train you're looking for is a runner or diverted.

DB CARGO

WCML / Scotland / Midlands / NW England:

Alterations for DB Cargo are no longer reported for the time being.
