On the evening of the above date, 90006 and 90014 ran into trouble on the North London Line (NLL) near Camden Town whilst working 4S88. According to reports 90006 suffered a complete loss of power (COP), but I am unable to verify if the train was rescued or it managed to limp to Wembley or not. The two 90s transferred back to Crewe the following day for attention, but again unable to confirm how they returned to Crewe Basford Hall (it is presumed that they were hauled dead by some other means).

The operating incident blocked the NLL for a couple of hours which resulted in multiple cancellations particularly for London Overground.
