

# Engineering Work Alterations

---

October 2025

Updated 22/9/25

---

## NATIONAL SUMMARY

Nothing to report at the time of posting.

## FREIGHTLINER

The service alterations summarised below are for those routes, which Freightliner class 90s operate on.

### West Coast Main Line

#### WCML / Scotland / Midlands / South / NW England:

There were no known alterations to report on at the time of publication. However, engineering work does take place on various sections of the WCML during the week and at weekends at short notice. It is advisable to check real-time data sources for specific trains on specific days just to be sure that the train you're looking for is a runner or diverted.

### East Anglia / GEML

- Saturday 27<sup>th</sup> / Sunday 28<sup>th</sup> September - The GEML is shut between Ipswich and Colchester, diversions apply via Ely using diesel traction.

For the remainder of this period, there is no planned engineering work on the GEML. However, this situation can change at very short notice, therefore it is advisable to check real-time data sources for specific trains on specific days just to be sure that the train you're looking for is a runner or diverted.

---

## DB CARGO

### WCML / Scotland / Midlands / NW England:

Alterations for DB Cargo are no longer reported for the time being.
